RESEARCH INTERESTS

Large Language Model (LLM) in Buildings, (Urban) Building Energy Modeling, High-Resolution Calibration, Physics-Informed Machine Learning, Fault Detection & Diagnosis

EDUCATION

- **The University of Utah** Salt Lake City, UT, USA
Ph.D. in Civil Engineering Aug. 2022 – Jun. 2026 (Expected)
- **Tianjin University** Tianjin, China
M.Sc. in Architecture & Building Sciences; With Honor Aug. 2019 – Jun. 2022
- **Yancheng Institute of Technology** Yancheng, Jiangsu, China
B.Sc. Heating, Ventilation, & Air Conditioning; With Honor Aug. 2015 – Jun. 2019

RESEARCH EXPERIENCE

- **The University of Utah** Salt Lake City, UT
Research Assistant Aug. 2022 - Present
 - **US-NSF #2311685**: (Primary Contributor) Developed a **natural language-driven auto-building energy modeling platform (EPlus-LLM)** by integrating a large language model with physics-based simulation.
 - **US-NSF #2318720**: (Contributor) Conducted **co-simulations of thermo-responsive desiccants** for building dehumidification and decarbonization using EnergyPlus, Modelica, and Ansys.
 - **Global Change & Sustainability Center**: (Primary Contributor) Developed **high-fidelity building models** (by Resistance-Capacity mechanism and EnergyPlus software) and **efficient calibration framework** that integrates an **enhanced Bayesian inference method** with a **deep-learning-based high-resolution surrogate model**, facilitating the development of Digital Twins for real-time monitoring and fault detection.
 - **US-Utah-DOT #24-8342**: (Primary Contributor) Designed a **scalable Vision-AI tool** for automated road condition assessment.
- **Tianjin University** Tianjin, China
Research Assistant Aug. 2019 - Jun. 2022
 - **China-NSFs**: Developed **fault detection & diagnosis** methods for building systems with **incomplete data**, **integrating Modelica simulations with machine learning** to enhance accuracy and robustness.
 - **Industry Projects**: Conducted research on building energy efficiency and management, focusing on **optimizing energy efficiency and sustainability strategies**.
- **Amazon Web Services (AWS)** Beijing, China
Intern Jun. 2021 - Dec. 2021
 - **Data Center Design**: Assisted in **planning and optimizing** data center infrastructure, including local generators, uninterruptible power supplies (UPS), power distribution, cooling systems, and network architecture to enhance **resilience and scalability**.
 - **Data Center Operation**: Contributed to improving **energy efficiency and fault detection** in data centers through **operational optimizations and system monitoring**.

TEACHING EXPERIENCE

- **The University of Utah** Salt Lake City, UT
A Course in Building Energy Modeling *Aug. 2023 - Dec. 2023*
 - **Computer Lab Instructor** : Led a 2-week hands-on session on building energy modeling using EnergyPlus, focusing on sustainable building design and building energy efficiency.
 - **Teaching Assistant** : Assisted with computer lab sessions, supporting course logistics, preparing class materials and syllabus, and helping students with hands-on coding assignments.

CONFERENCE & WORKSHOP PRESENTATIONS

- **ASHRAE CIDCO**: Automating Building Energy Modeling from Natural Language. Feb. 2026. [Invited Oral Presentation](#)
- **ASHRAE Annual**: EPlus-LLM: A Novel Automated Building Simulation Platform Using Natural Language. Jun. 2024. [Oral Presentation](#)
- **GCSC Environment and Sustainability Research Symposium**: Improved Bayesian Calibration of Campus Building Energy Models. Feb. 2023. [Poster](#)

SERVICES

- **GitHub Maintainer**: I maintain the open-source GitHub repositories [EPlus-LLM](#) and [Prompting-ABEM](#), and actively respond to issues.
- **Independent Reviewer**: *Cell Reports Physical Science*; *Renewable & Sustainable Energy Reviews*

- **Student Member:** ASHRAE

PROGRAMMING SKILLS

- **Programming Languages:** Python, PyTorch, JavaScript
- **Technologies:** High-Performance Computing on Linux, Fine-Tuning & Prompt Engineering for LLMs, Retriever-Augmented Generation, Physics-Informed Modeling, RC (Resistance-Capacity) Modeling, High-Resolution Bayesian Calibration, Incomplete Data-based Fault Detection & Diagnosis
- **Software:** EnergyPlus, SketchUp, Matlab, Dymola (Modelica)
